

MC2

OUTSIDE THE BOX

Today's Outline:

1. Communications:
 1. Learning to walk
 2. Future Pacing
 3. Health Development Model
2. Moving from "Driver's Ed" to "Carrera" in making your assessment
3. Open Adjusting
4. Three Dimensionality and Vibratory Frequencies
5. General torque fields of the body: Enhanced Bio-Toning. Increased Efficiency.
 1. Finding Them
 2. Using Them
6. Extremities in a Tonal MC2 model
7. A NEW Anterior T-12 procedure with associated cervical implications
 1. QL insertion and lateral flexion
 2. Assessing and Correcting Phrenic Nerve Involvement
8. Understanding and implementing "states of nervous system arousal" in practice
 1. The BioChart and its implications
 2. Use of the Arthrostim
 3. Understanding and utilizing BrainTap to engage and enhance neuroplasticity
 4. Understanding and using evoked potentials from the vibratory frequencies of essential oils
9. Q and A
10. Resources
11. Future Technology Developments
12. Opportunity to hone hand's on skills
